

Buenos Aires, December 16 th 1992.

Mr. PETER MARSHAL

Present

As I got knowledge about the existence of a register, made by yourself about ALFA ROMEO cars, I want to make you know about a car that belongs to me, to see if you can consider to include it in your publication. It is an ALFA ROMEO (of course) 6 C - 2300 B - 1000 MIGLIA - year 1938 - chassis number 815-074 and engine number 824.029.

Now I want to give you some details and information about the reconstruction of the car, that it was found in the Uruguay Republic (Paysandú Department) in 1988. The car was in a state of abandonment (ph 1), after having participated in several competitions in that country.

After I got all the documents belonging to the car and to its authenticity, I imported it to Argentina, because I wanted to work on it so as to reconstruct the car.

This was a task that I started in 1989, with the help of a man who knew how to bring back (classic cars) to original state by repairing, repainting, etc.

After three years work, we could finish the work and to my proud and satisfaction, the car and the work we did on it was worthy of praise for people who knows too much about this matter (ph 2-3).

In May 1992, the car was exported to Italy (ph 4) where it was introduced and it participated in the classic 1000 MIGLIA 1992 (ph 5-6).

At the moment the car is in Brescia (Italy) ready to

⊕

participate in the May 1993 Competition.

I should like to keep in touch with you, so you can see the car and tell me your opinion about the work done to it and what you think about it.

In case you are interested in this, and should like to communicate with me before that date, I send you my 

I thank you for having read the letter, I send you my regards.
