

CAR FOR CAT LOVERS -- The Pantera 7X advanced show car was crafted by Ford Motor Company's Ghia studios and shops in Italy as a practical derivative of the current Pantera L. The Pantera (it means panther in Italian) is sold by Lincoln-Mercury dealers under "sign of the cat." Built to demonstrate how the exotic European road car could be redesigned to accommodate federal safety and damageability requirements and the 1975 California emission standards, the Pantera show vehicle manages to retain the sleek, agile image of the current production car.
