To whom it may concern
1928 Riley Brooklands Gnp.

Chassis No 6019 Reqn No WK6652

I have known this Riley for many years and was pleased to assist when it needed rebuilding by choice of engineer and body builder of high quality. This was done satisfactorily and the Riley's performance has been satisfactory, the body having been built to a prewar style used in the Riley works. WK6652 was a works' car and was driven by Mr Percy Riley in early TT Races over in Ireland - 1928 + 1929.

I have been please to help the Vintage Sports Car Club with Riley motor cars in the past.
