## 1990 AC COBRA 'LIGHTWEIGHT' - R.H. DRIVE

Ch. No. AKL 1351 is the last of 6 genuine, original 'Lightweights' (flat dash, no heater or screen vents, no headrests etc.) that I personally ordered from the AutoKraft/AC Cars Ltd. Factory in 1990. Many special features incl. up-rated suspension with front and rear anti-roll-bars, 1965-type Mk III dash with Smiths instruments, satin finish stone-guards, large capacity fuel tanks, Avon CR6ZZ 15" tyres, driver and passenger harnesses etc. The Factory hand-built and blue-printed 302 cu.in. engine has alloy heads, roller cam and solid lifters etc. giving 345 bhp and 0-100 mph in 10.1 secs. Porsche Zinc metallic with burgundy trim; full (black) weather equipment in tailored bags. With just 6,620 miles from new this is certainly one of the best of the c. 26 'Lightweights', which are now established as the most desirable of all the latter-day AC Cobras built at the Brooklands Factory.

## 1984 AC COBRA 427 Mk IV - L.H. DRIVE

One of only 2 L.H. Drive 427 (7 Litre) Mk IV AC Cobras built in their entirety by AC Cars Ltd. at Brooklands, Surrey and exported to the USA. Reimported to the UK in 2012 and registered with the cherished number 12 ACC. Totally rebuilt Peter Knight all aluminium period engine giving 511 bhp and 553 lbs.ft. (dyno-reading print-out); 4 speed 'top-loader' g/box and high axle-ratio (2.88:1) for improved touring performance; 15" Halibrand wheels with new Avon tyres; uprated suspension with anti-roll bars etc. All work carried out by Thunder Road in Woking. 8,000 miles from new with fully documented history including original USA titles and correspondence/photographic records of the Cobra's manufacture at the AC Factory in 1984. Superb condition throughout and complete with full weather equipment. Absolutely mind-bending performance but totally tractable for all road conditions and Club events for AC's etc. An exceptional opportunity!
