FROM: BARRY SILVERMAN

NUMBER OF PAGES (INCL. COVER): 2

Dear Bruce:

Attached is a drawing of the 8-V dash layout.

Car History

Please note, in case I forget to tell you, that this is one of only four cars that the factory made up especially as racing versions. Those cars were 031 through 034. This car is the last of the special race car series and also the last of the Series 1 cars. The Series 2 cars were the 4-headlight versions, which are not anywhere near as attractive or desirable.

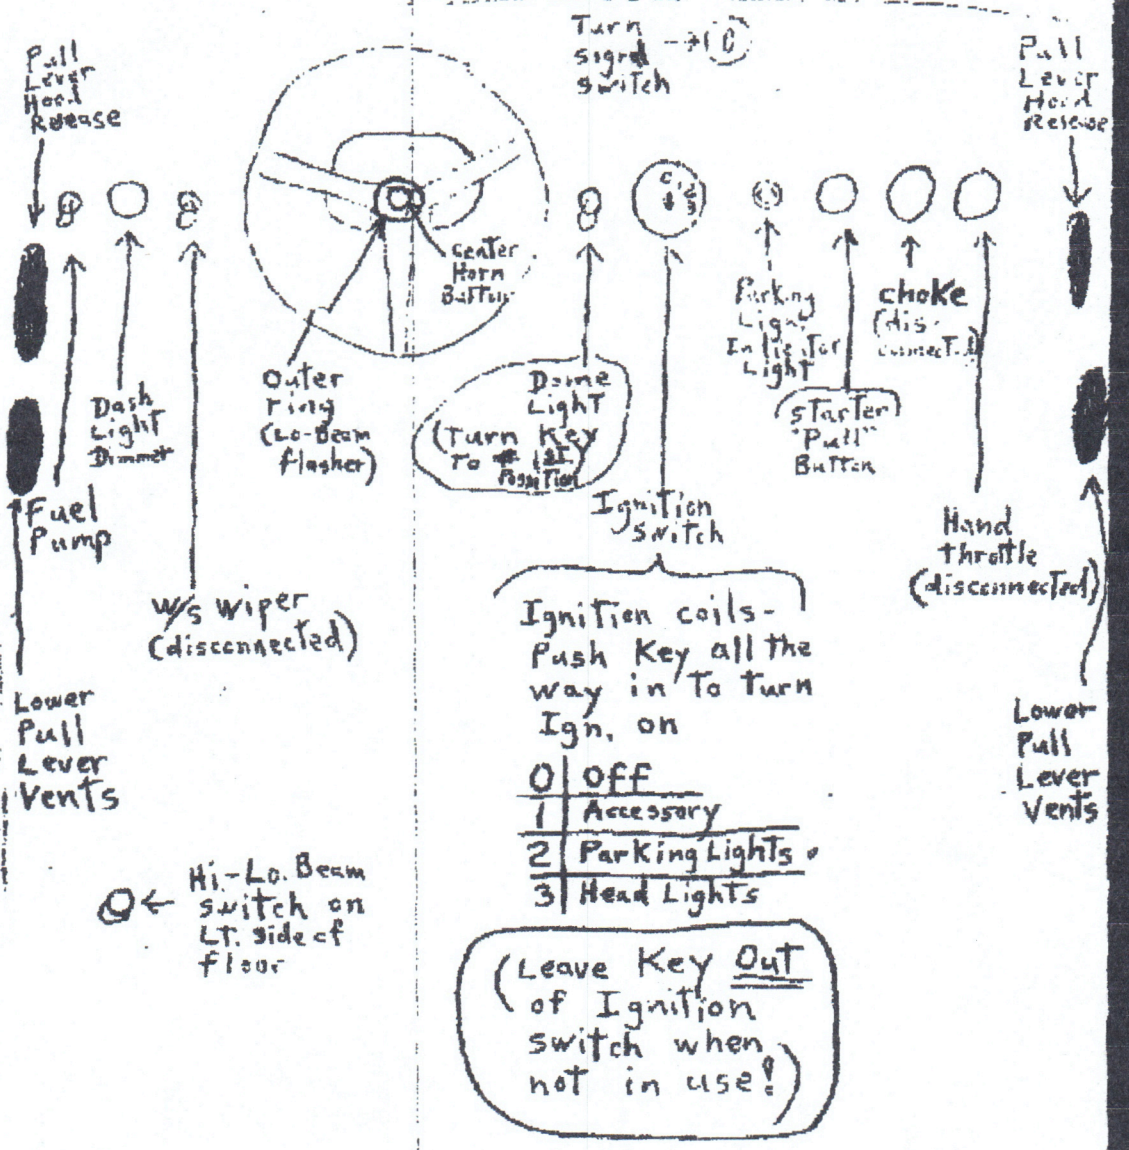

Thanks.

Regards,

Barry
