

1976 I bought a Bizz Strada 0307 from Giotto and this was the first time I saw 0507.

I made a down payment for it in -77 and I collected it in -78 and drove it home.

I never saw any reg plate on it, but I noticed that Giotto had PROVA plates. Both cars had the SCUDERIA BIZZARRINI in the rear screen, so they were certainly used as "team cars".

I used it for a couple of trips to the OGP at N-ring with my wife and for car meets and things like that.

Car was garaged when we moved to France and during this time the rear screen mysteriously cracked in 1000 pieces so I never drove it again.

Sold it to Malte Fromm 5-6 years ago and he did a great job I think, kept the original colour!

To the best of my knowledge only 11 cars were built before the company closed its doors in -68.

I have seen some original cars and they all had "matching engine numbers". 0507 has engine number 207R, 0511 211R and 0505 0205R.

Attached some old pics I found, mostly taken at Giotto's place in -76.
