

Driven by Marussia, with engines by Ferrari, construction via Lotus, equals another rally car for Chevrolet

Marussia's new Formula 1 team has a long way to go before it can be considered a serious contender for the title. The team's first race was a disaster, with the car crashing out of the race. However, the team's management is confident that they will be able to improve their performance in the future. The team's management is confident that they will be able to improve their performance in the future.
