Dear Colin,  
a friend of mine told me that you was the owner of the 1938 Alfa Romeo 6C 2300  
MM chassis 813915  
It is true?  
Thanks in advance if you have any information.  
Best regards  
Sandro

15/03/20, 12:43

Dear Sandro. This was an excellent car I bought in Brazil, drove in the MM, then sold to someone in Switzerland in about 1996. I regret that I am unable to help further. You must contact an Alfa expert! Best wishes, Colin.

15/03/20, 13:40

Dear Colin, thank you for the information. Do you remember - more or less - the year when you bought it in Brazil? And the condition of the car at that time?  
If you find some pictures please send me to [sandro.binelli@automotivemasterpieces.com](mailto:sandro.binelli@automotivemasterpieces.com)  
We are trying to trace the history of this car.  
Thank you again for your help. I am in contact with Alfa Romeo experts and registrars  
Best regards.  
Sandro

The Alfa had an interesting feature. The windows were all made of plastic. I always felt it must have been built for some competition. Actually it was a very good car, not very fast - 110 kph but very reliable, so good that I drove it back to England without a problem.
